

## WHAT ARE HUMANIST GOALS FOR SOCIETY?

It is up to us to make the world a better place. If we want things to be better we need to do it ourselves, while we have the opportunity. It is our **responsibility**.

ALEX

Recognising that we are all human can help us to see that we should treat people **equally**. It's about making sure that everyone is treated **fairly** and has the opportunities to live their lives the way they want to.

LINDSAY

This is the **one life** we have. We need to work together to support fairness and happiness in the **here and now**. We need to take **action**. We can't do everything on our own, but we can each help to make a difference.

GUY

We should all have the **freedom** to believe what we want to believe and to say what we want to say. We should all have the **right** to health care, to an education, to be able to love and marry who we want, and to have a say over how our country is run.

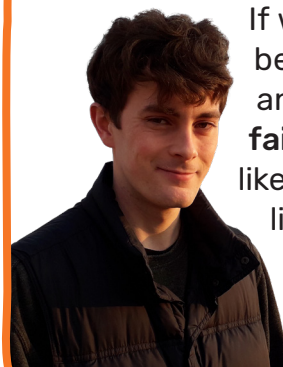

IAN

We all want to be **free** to choose how we live. We all want to be treated **fairly** and **kindly**. So if we promote these goals, then life will be better for everyone.

LAUREN

If we are all **free** to believe what we want and are all treated **fairly** then we are likely to be happier and live together more **peacefully**.

JULIAN
